If you thought fleet management was only for the “heavyweights” of the fleet world, then think again. Introducing MiX Fleet Manager Essential, the perfect solution for fleet managers and owners looking for basic tracking, and vehicle and driver management. MiX Fleet Manager Essential offers an indispensable set of features designed to give fleets of all sizes and types exactly what they need to boost efficiency – no more, no less.

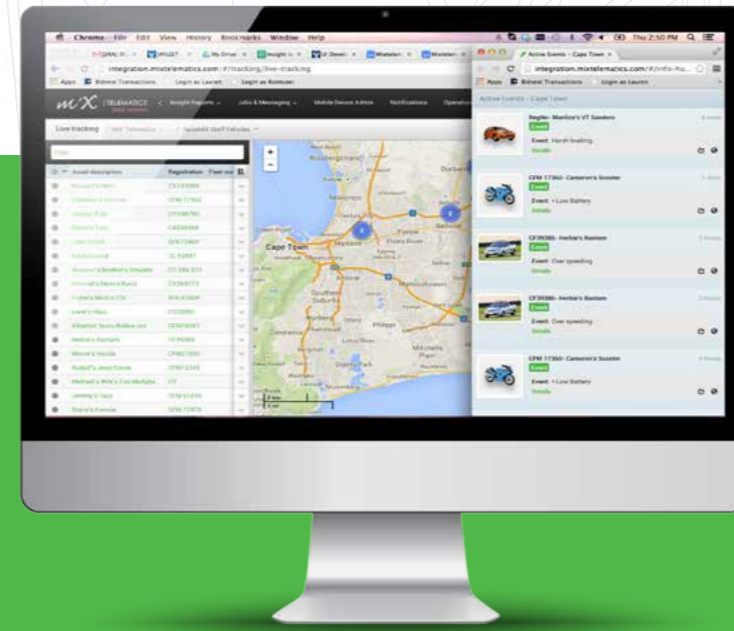

## Fleet management for everyone.

MiX Fleet Manager Essential enables fleet operators to track and trace the movement and behaviour of their vehicles and drivers from anywhere, at any time.

For that to happen, vehicles are fitted with a small on-board computer that captures and transmits vehicle and driver data. Users can then access this information online, via the solution’s secure platform. Some features are also available via MiX Fleet Manager Mobile, the solution’s free app for Android and iOS.

Be it a fleet of trucks or a mixed fleet of cars, vans and motorcycles, MiX Fleet Manager Essential is fleet management made easy.

## The building blocks of success.

The brains behind MiX Fleet Manager Essential is its feature-rich software platform, available in 18 languages. Users – typically business owners or fleet managers – can log on and access activity timelines, insightful reports, notifications, an information hub and more.

- ✓ Track vehicles on a map in real-time, or do a replay
- ✓ Define and manage locations, stops and zones
- ✓ Get notifications (online and via email) for these events: impact, speeding, harsh braking, harsh acceleration and harsh cornering
- ✓ Identify and manage drivers, licences and certifications
- ✓ Manage vehicles, odometer readings, licences, certifications and services
- ✓ Generate movement, event, and trip and utilisation reports

## Give a little, get a lot.

MiX Fleet Manager Essential offers the ultimate benefit of knowing exactly where vehicles are and how they’re being driven: peace of mind.

- + Simple
- + Affordable
- + Reliable

Another major advantage is improved customer service. By being able to find the closest vehicle to a customer, the number of customer visits can be increased and estimated times of arrival improved. Distances travelled can also be monitored and reduced, while vehicle misuse can be detected and stopped.

MiX Fleet Manager Essential is affordable and accessible to fleets of all types and sizes, making it the obvious and convenient choice.
